

Ready. For any challenge.

Our business unit is specialized in the design and manufacture of high-quality protective elements that impress with their quality and short period of time from planning to delivery. Our standard range includes a large range of caps, plugs, covers and much more.

Apart from this there is always room for customised solutions. These are developed in close cooperation with our customers at modern CAD workstations.

We manufacture our articles for a huge number of well-known companies in the following product areas:

- **Agricultural technology**
- **Automotive**
- **Consumer goods industry**
- **Mechanical engineering**
- **Packaging industry**
